BENEFITS

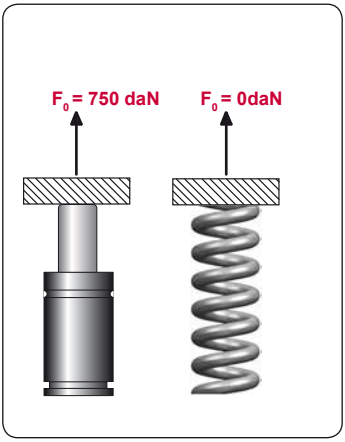

AZOL GAS

ENG	Reduction of surface area used, height, and volume occupied.
DEU	Beansprucht weniger platz, Höhe und volumen.
FRA	Réduction de la surface occupée, de l'espace en hauteur, et du volume total occuupée.
ITA	Riduzione della superficie occupata, dello spazio in altezza, del volume occupato.
ESP	Reducción de la superficie usada, de la altura, y del volumen ocupado.
POR	Redução da superficie ocupada, do espaço en altura, del volumen ocupado.

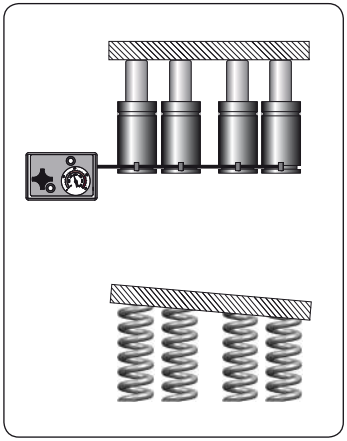

ENG	Considerable height reduction for the same working deflection and force. Compact tool construction.
DEU	Im allgemeinen beträchtliche Verminderung der Höhe, bei gleichem Hub und gleicher Kraft. Kompaktere Werkzeug konstruction.
FRA	Réducion importante des encombrements en hauteur avec une course et une force équivalente. Construction plus compacte de l'outillage.
ITA	Notevole riduzione degli ingombri in altezza a parità di forza e corsa. Construzione dello stampo più compatta.
ESP	Reducción notable de la altura para fuerzas y carreras equivalentes. Construcción más compacta del troquel.
POR	Redução notável em altura com igual força e curso. Construção mais compacta da Ferramenta.

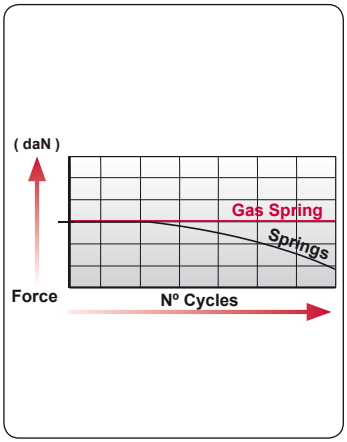

ENG	Considerable reduction of retaining devices to preload. No preload required.
DEU	Kein Bedarf an Vorrichtungen für Vorspannen, Führung und Aufnahme. Beseitigung der Vorspannung.
FRA	Réduction importante du nombre de dispositifs de précharge et guidage. Elimination de la précharge.
ITA	Eliminazione dei dispositivi di precarico e guidaggio. Eliminazione precarico.
ESP	Eliminación de los dispositivos de precarga y guíado. Eliminación de la precarga.
POR	Eliminação de dispositivos de pré-carga e guidamento. Eliminação da pré-carga.

AZOL GAS

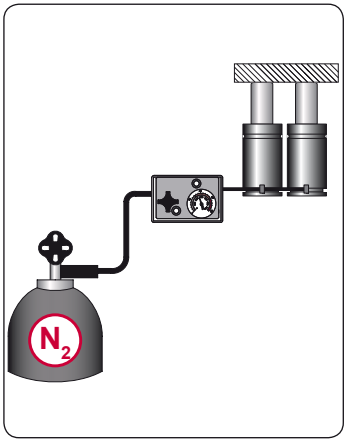

BENEFITS

ENG	Always the same force on each contact point. Forces may be positioned exactly where required. System may be continually pressure monitored.
DEU	Stets ausgeglichene und gleichförmige Kraft an allen Kontaktpunkten. Exakt an der gewünschten Stelle des Gesenks anwendbare Kraft. Ständige Sichtanzeige des Betriebsdrucks.
FRA	Force tojours équilibrée et égale en tous points de contact. Force que l'on peut positionner exactement là où elle est exigée dans l'outil. Visualisation continue de la pression dans le système.
ITA	Forza sempre bilanciata in tutti i punti di contatto. Forza posizionabile esattamente dove richiesto nello stampo. Visualizzazione continua della pressione.
ESP	Fuerza siempre equilibrada en cada punto de contacto. Fuerza posicionable en el troquel donde se require exactamente. Visualización continua de la presión.
POR	Força sempre equilibrada em todos os pontos de contacto. Força posicionáve exactamente onde é necessária na Ferramenta. Visualização continua da pressão.

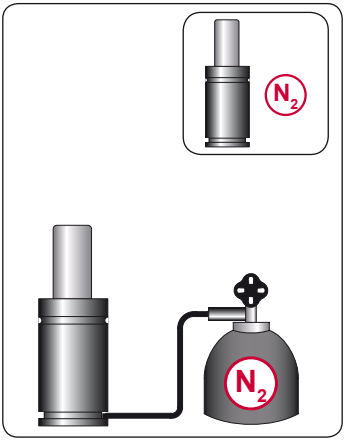

ENG	Controlled production conditions on piece-parts during forming and drawing operations. Less rejection of piece-parts.
DEU	Bessere Kontrolle des Werkstucks während den Phasen des Formens und des Ziehens. Bessere qualität der fertigen Werkstücke. Weniger Ausschuss.
FRA	Un meilleur contrôle de la pièce pendant les phases de découpage et d'emboutissage. Une quantité moindre de rebuts en production.
ITA	Migliore controllo del materiale durante le fasi di formatura e imbutitura. Migliore qualità dei pezzi stampati. Minori scarti di produzione.
ESP	Mayor control de las condiciones de producción durante las operaciones de conformado y embutición. Mejor calidad de las piezas. Menores rechazos en piezas.
POR	Melhor controlo dos materiais durante a fase de formação e de cunhagem. Melhor qualidade das peças estampadas. Menores desperdicios na produção.

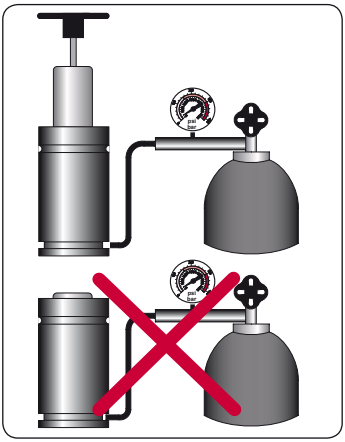

ENG	Gas springs applied to provide the real forces required. Assurance of defined forces. The same cylinder may be re-used for different applications.
DEU	Anpassung der Zylinder an die effektiv erforderliche Kraft. Gewissheit der definierten Kräfte. Verwendung desselben Zylinders für unterschiedliche Arbeiten.
FRA	Adaptation des ressorts à gaz aux forces réellement requises. Certitude des forces définies. Utilisation d'un même ressort à gaz dans des travaux différents.
ITA	Adeguamento dei cilindri alle forze realmente richieste. Utilizzo di uno stesso cilindro in lavori diversi.
ESP	Adecuación de los cilindros a las fuerzas realmente necesarias. Utilización de un mismo cilindro en trabajos distintos.
POR	Adaptação dos cilindros a las forças realmente necessárias. Utilização do mesmo cilindro em diferentes trabalhos.

OPERATING INSTRUCTIONS

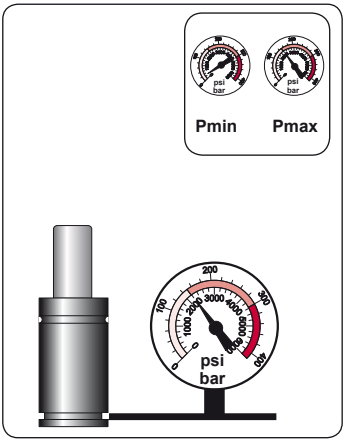

AZOL GAS

ENG	Charge only with NITROGEN (N_2).
DEU	Gasdruckfedern dürfen nur mit Stickstoff gefüllt werden.
FRA	Charge seulement avec du GAZ AZOTE (N_2).
ITA	Caricare soltanto con GAS AZOTO (N_2).
ESP	Cargar únicamente con GAS NITROGENO (N_2).
POR	Carregar somente com GÁS de NITROGÊNIO (N_2).

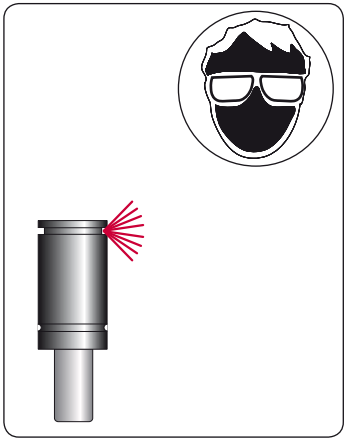

ENG	Never fill a gas spring when the piston rod is not fully extended.
DEU	Befüllung der Gasdruckfeder nur bei voll ausgefahrener Kolbenstange.
FRA	Ne remplissez jamais un ressort où la tige n'est pas entièrement sortie.
ITA	Caricare il cilindro ad azoto solo quando lo stelo e' completamente estratto.
ESP	No cargar un cilindro de gas si el vástago no está completamente extendido.
POR	Não carregue o cilindro se a haste não estiver totalmente fora do cilindro.

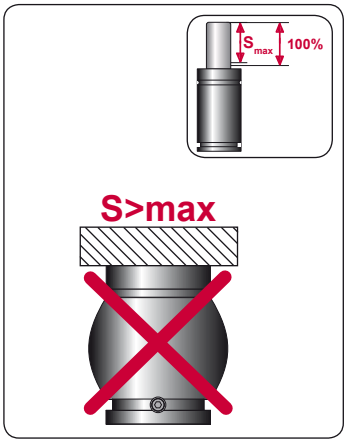

ENG	Charge the gas springs between the minimum and the maximum allowable pressure.
DEU	Gasdruckfedern dürfen nur zwischen dem minimalen und maximalen zulässigen Fülldruck befüllt werden.
FRA	Chargez le ressort à gaz du minimum jusqu'à la pression maximale autorisée.
ITA	Caricare il cilindro ad azoto entro la pressione minima e massima autorizzata.
ESP	Cargar el cilindro de gas entre la presión mínima y máxima permitida.
POR	Sempre carregue o cilindro dentro do pressão mínimo e máximo autorizado.

AZOL GAS

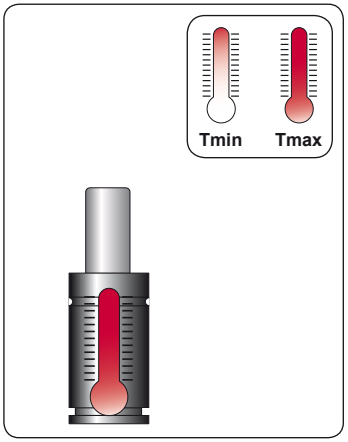

OPERATING INSTRUCTIONS

ENG	When discharging a gas spring point the gas flow away from operator or anybody else.
DEU	Beim Entladen Ventil nicht auf Personen richten.
FRA	Pendant la décharge, dirigez l'écoulement de gaz à l'écart de l'opérateur ou d'autre personne.
ITA	Durante lo scarico, orientare il flusso del gas in direzione opposta all'operatore ad altra persona.
ESP	Durante la descarga, orientar el flujo de gas fuera del alcance del operador o de cualquier persona.
POR	Durante a descarga do cilindro aponte o fluxo de gás fora do alcance do operador ou qualquer outra pessoa.

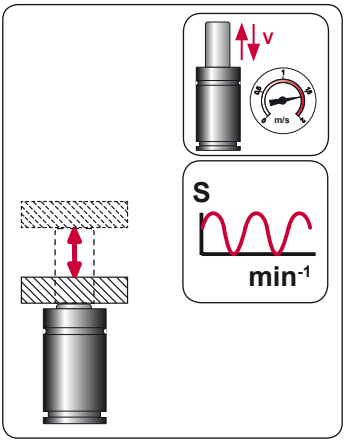

ENG	Maximum recommended stroke 90%. Overstroke >100% would cause damages to the cylinder and serious risks.
DEU	Es wird empfohlen, eine 10%ige Hubreserve einzuplanen. Ein Überhub führt zur Zerstörung der Gasdruckfeder mit großen Risiken für Gesundheit und Leben von Personen.
FRA	Course recommandée maximale 90%. Une course au dessus de 100% causerait des dommages au cylindre et de graves risques.
ITA	Corsa massima suggerita 90%. Una corsa > 100% danneggia il cilindro e provoca gravi rischi.
ESP	Carrera máxima recomendada 90%. Excesos de carrera > 100% causarían daños al cilindro y graves riesgos.
POR	Curso de trabalho máximo recomendado de 90%. Curso maio que 100% causará danos ao cilindro e riscos graves.

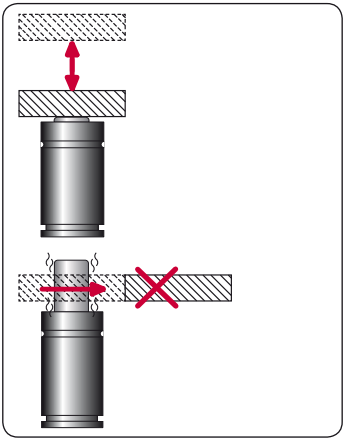

ENG	Operating temperature.
DEU	Arbeitstemperatur.
FRA	Température de fonctionnement.
ITA	Temperatura di funzionamento.
ESP	Temperatura de funcionamiento.
POR	Temperatura de funcionamento.

OPERATING INSTRUCTIONS

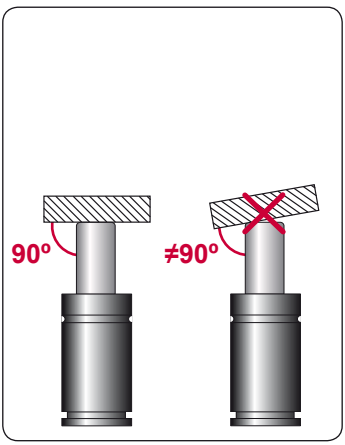

AZOL GAS

ENG	Do not exceed the maximum allowed stroke speed. Maximum allowed cycles per minute should never be exceeded.
DEU	Überschreiten Sie nicht die maximal zulässige Kolbengeschwindigkeit. Die maximale Hubfrequenz sollte nicht überschritten werden.
FRA	Ne dépassez pas la vitesse maximale de course autorisée. Les cycles par minute maximales autorisées ne doit jamais être dépassée.
ITA	Non superare la velocità massima di corsa autorizzata. I cicli massime autorizzate al minuto non deve mai essere superata.
ESP	No superar la velocidad máxima de carrera. El número de ciclos por minuto permitidos no debe superarse.
POR	Não exceda a velocidade máxima do curso autorizada. Os ciclos máximos autorizados por minuto não deve ser excedido.

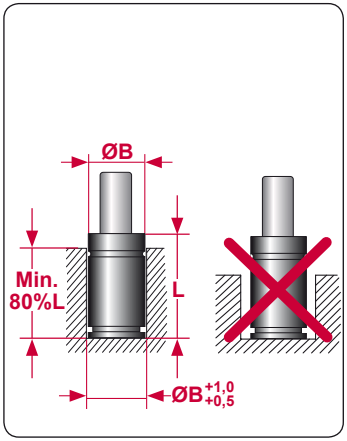

ENG	Avoid freely release of the piston rod, this would cause damages to the gas spring.
DEU	Ein freier Rückhub muss vermieden werden, um Beschädigungen an der Gasdruckfeder zu vermeiden.
FRA	Évitez le dégagement libre de la tige de piston, ceci endommagerait le ressort à gaz.
ITA	Evitare il ritorno libero dello stelo, per non danneggiare il cilindro ad azoto.
ESP	Evitar el retorno libre del vástago, esto dañaría al cilindro de gas.
POR	Evite que a haste trabalhe livremente, isto causará danos ao cilindro.

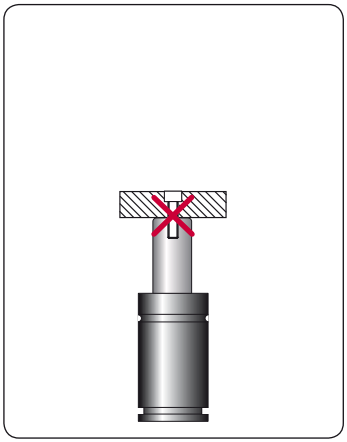

ENG	Gas springs must always work completely perpendicular to the contact surface. Side loads increase wearing and reduce life expectancy.
DEU	Es dürfen keine seitlichen Kräfte auf die Gasdruckfedern wirken, da sich sonst die Lebensdauer wesentlich verringert.
FRA	Les ressorts doivent toujours fonctionner complètement perpendiculaire à la surface de contact. Les charges latérales augmentent l'usure et réduisent la durée de vie.
ITA	Le molle a gas devono funzionare sempre completamente il perpendicolare alla superficie di contatto. I carichi laterali aumentano l'usura e ne riducono la durata.
ESP	Los cilindros de gas deben siempre trabajar de manera perpendicular a la superficie de contacto. Las cargas laterales aumentan el desgaste y reducen la vida útil.
POR	Os cilindros devem sempre trabalhar de forma perpendicular à superfície de contato. As forças laterais aumentam o desgaste e reduzem a vida útil do cilindro.

AZOL GAS

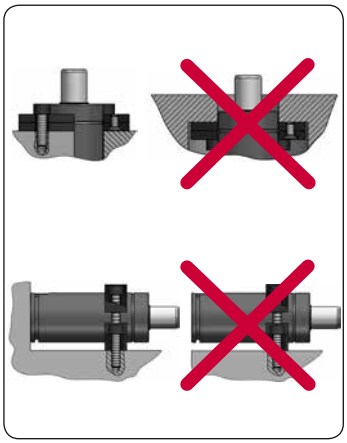

OPERATING INSTRUCTIONS

ENG	When the gas springs are installed into a bored pocket, the bored pocket diameter should not exceed 1mm larger than the gas spring body diameter. And the bore pocket depth must be minimum 80% of L.
DEU	Werden Gasdruckfedern in Vertiefung eingebaut, so sollte der Bohrungsdurchmesser nur 1 mm größer als der Federdurchmesser sein. Die Vertiefung sollte mindestens 80% von L betragen.
FRA	Quand les ressorts sont installés dans une poche, le diamètre de poche ne devrait pas dépasser 1 mm de plus que le diamètre de corps du ressort. Et la profondeur de la poche doit être au minimum de 80% de L.
ITA	Quando le molle a gas sono installate in una sede alesata, il diametro alesato della stessa non deve essere superiore di 1mm, rispetto al diametro del corpo della molla a gas. E la profondità della sede alesata deve essere di almeno 80% di L.
ESP	Cuando los cilindros de gas se instalan en una cajera, el diámetro de la cajera no debería exceder 1mm de la dimension del cuerpo del cilindro de gas. Y la profundidad de la cajera debe ser como mínimo el 80% de L.
POR	Quando o cilindro for instalado dentro de um alojamento, o diâmetro do mesmo não pode exceder 1mm do diâmetro do corpo do cilindro. E a profundidade do alojamento deve ser no mínimo 80% de L.

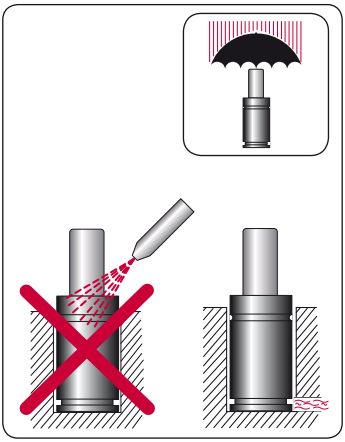

ENG	Do not use the piston rod threaded hole for fixing the gas spring into the tool. This hole is only to be used for maintenance operations.
DEU	Das Gewinde in der Kolbenstange dient nur zu Wartungsarbeiten und darf nicht zur Befestigung der Gasdruckfeder benutz werden.
FRA	N'employez pas le trou fileté de tige de piston pour la fixation du ressort dans l'outil. Ce trou doit être employé seulement pour des opérations d'entretien.
ITA	Non usare il filetto dello stelo per la riparazione durante il lavoro. Il filetto deve essere usato solamente per gli interventi di manutenzione.
ESP	No usar el agujero roscado del vástago para la fijación del cilindro al útil. Este agujero sólo debe emplearse para operaciones de mantenimiento.
POR	Não use o furo rosqueado da haste para fixar o cilindro. Ele só deve ser utilizado em serviços de manutenção.

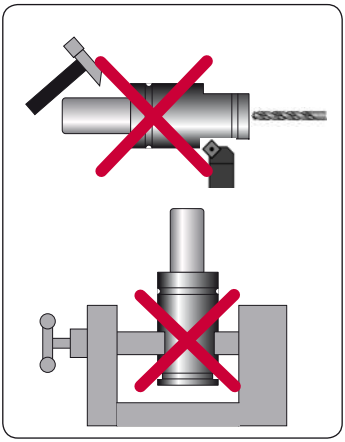

ENG	Fix the gas spring into the tool through the appropriate mount.
DEU	Die Fixierung der Gasdruckfeder sollte mit der vorgesehenen Befestigung erfolgen.
FRA	Fixez le ressort à gaz dans l'outil par la bride appropriée.
ITA	Fissare i cilindri ad azoto solamente con gli specifici elementi di fissagio.
ESP	Fijar el cilindro de gas al útil mediante las bridas adecuadas.
POR	Fixe o cilindro na ferramenta com a flange adequada.

OPERATING INSTRUCTIONS

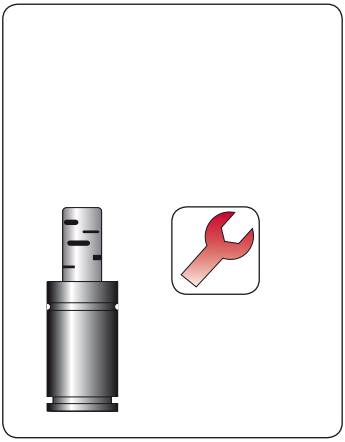

AZOL GAS

ENG	Protect the gas springs from solid or liquid contaminants. Provide adequate drainage in gas springs pockets.
DEU	Schützen Sie die Gasdruckfedern vor Kontakt mit festen oder flüssigen Verschmutzungen. Bei Einbau in Kavitäten müssen Drainage-Kanäle eingebracht werden.
FRA	Protégez les ressorts à gaz contre les contaminants solides ou liquides. Un drainage dans les poches des ressorts est recommandé.
ITA	Proteggere i cilindri ad azoto da ogni contaminazione solida o liquida. E' suggerito uno scarico sufficiente nel caso di sede alesata.
ESP	Proteger los cilindros de gas de contaminantes sólidos o líquidos. Proporcionar drenaje adecuado a las cajeras donde se instalan los cilindros.
POR	Proteja os cilindros de contaminadores sólidos ou líquidos Recomenda-se a drenagem dos alojamentos.

ENG	Avoid whatever impatct and do not make any mechanical work on the gas spring body or piston rod.
DEU	Schützen Sie die Gasdruckfeder insgesamt (besonders Körper und Kolbenstangen) gegen mechanische Beschädigung.
FRA	Evitez quelqu'impact que ce soit et ne faites aucun travail mécanique sur la tige ou le corps du ressort à gaz.
ITA	Evitare ogni lavoro meccanico ed ogni danneggiamento al corpo e allo stello della molla a gas.
ESP	Evitar cualquier impacto o trabajo mecánico en el cuerpo o vástago del cilindro.
POR	Evite qualquer impacto ou trabalho mecânico tanto na haste como no corpo do cilindro.

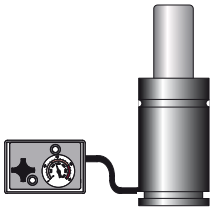

ENG	Gas springs with scratches on the piston rod surface should be replaced.
DEU	Gasdruckfedern mit Kratzern auf der Kolbestange-Oberfläche sollten ersetzt werden.
FRA	Des ressorts à gaz avec des éraflures sur la surface de la tige devraient être remplacés.
ITA	Le molle a gas con graffi sulla superficie dello stelo devono essere sostituite.
ESP	Los cilindros de gas con marcas en la superficie del vástago deberían reemplazarse.
POR	O cilindro que apresentarem riscos na haste a mesma deverá ser substituída.

AZOL GAS

OPERATING INSTRUCTIONS

ENG	Gas springs maintenance must be carried out only by skilled personnel, with the appropriate training, and always following the operating and service instructions from Azolgas.
DEU	Arbeiten an den Gasdruckfedern dürfen ausschließlich von geschulten Mitarbeitern durchgeführt werden. Die technischen Hinweisen, Vorgaben und Anweisungen von Azolgas müssen unbedingt und jederzeit befolgt werden.
FRA	L'entretien des ressorts à gaz doit être effectué uniquement par du personnel habilité, ayant les formations requises, et cela en respectant toujours les instructions de service d'Azolgas.
ITA	La manutenzione delle molle a gas deve essere effettuata solo da personale esperto, con preparazione specifica e sempre seguendo le istruzioni di servizio di Azolgas.
ESP	El mantenimiento de los resortes de gas debe ser efectuado por personal cualificado, con la debida formación, y siguiendo las instrucciones de utilización y mantenimiento de Azolgas.
POR	A manutenção dos cilindros deve ser realizada somente por pessoas qualificadas, com treinamento apropriado, e seguindo as instruções de funcionamento e manutenção da Azolgas.

ENG	Most of Azolgas gas springs could be used into linked systems. Linked systems allow users to easily monitor, control and adjust pressure.
DEU	Die meisten Azolgas Gasdruckfedern können durch Verschlauchung in einem Verbundsystem arbeiten. Das erleichtert das Steuern, Ablesen und das Anpassen des Druckes.
FRA	La plupart des ressorts à gaz Azolgas peuvent être utilisés dans les systèmes reliés. Cela permet facilement aux utilisateurs de surveiller, contrôler et ajuster la pression.
ITA	La maggior parte delle molle a gas della Azolgas possono essere utilizzate in sistemi collegati, che permettono agli utenti di verificare, controllare ed intervenire sulla pressione.
ESP	La mayoría de los cilindros de gas Azolgas pueden ser usados en sistemas conexionados, permitiendo al usuario la fácil monitorización, control y ajuste de presión.
POR	A maioria dos cilindros Azolgas pode ser utilizado em sistemas interligados, permitindo ao usuário fácil monitoramento e controla da pressão.

ENG	Designed and manufactured according PED 97/23/CE. The user of the gas springs is responsible for future inspections to be made to the springs in accordance with the regulations of the country where they will be used. Azolgas recommend to replace gas springs after 2 million strokes/10 years.
DEU	Gasdruckfedern sind entwickelt und hergestellt nach Drückgeräte-Richtlinie PED 97/23/CE. Der Benutzer hat dafür zu sorgen dass die nationale Richtlinien bezüglich Wartung und periodische Inspektionen unbedingt angehalten werden. Azolgas empfiehlt, die Gasdruckfedern nach 2 Millionen Hüben, spätestens nach 10 Jahren, zu ersetzen.
FRA	Conçu et fabriqué selon PED 97/23/CE. L'utilisateur des ressorts à gaz est responsable pour les inspections qui doivent être faits pour les ressorts à gaz conformément à la réglementation du pays où ils seront utilisés. Azolgas recommandent de remplacer des ressorts après 2 millions de cycles/10 années.
ITA	Progettato e prodotto secondo PED 97/23/CE. L'utente delle molle a gas è responsabile di future ispezioni da effettuare per le molle a gas, secondo le norme del paese in cui verranno utilizzati. Azolgas suggerisce di sostituire le molle a gas dopo 2 milioni di colpi/10 anni.
ESP	Diseñado y fabricado según PED 97/23/CE. El usuario del equipo a presión deberá responsabilizarse de las futuras inspecciones a efectuar a dicho equipo de acuerdo con la normativa específica del país en el que vaya a utilizarse. Azolgas recomienda reemplazar los cilindros de gas después de 2 millones de ciclos/10 años.
POR	Projetado e fabricado de acordo com a PED 97/23/CE. O usuário dos cilindros é responsável por inspeções futuras a serem feitas para os cilindros, de acordo com as normas do país onde eles serão utilizados. Azolgas recomenda a troca dos cilindros após 2 milhões de ciclos/10 anos.

INSTALLATION EXAMPLES

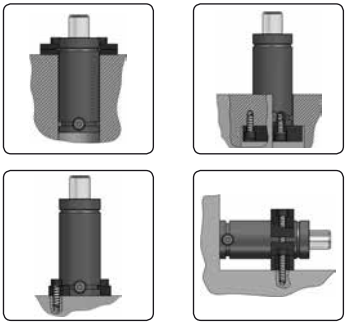

AZOL GAS

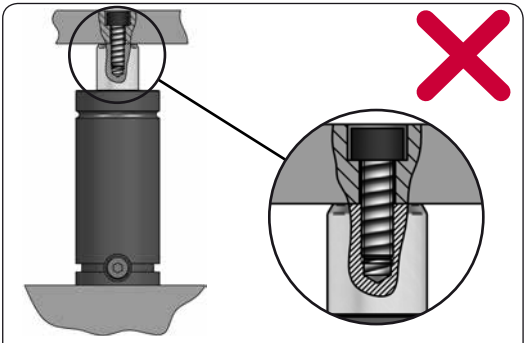

The bored pocket diameter should not exceed 1mm larger than the gas spring body diameter.
The bore pocket depth must be minimum 80% of L.
Provide adequate drainage in gas springs pockets when required.

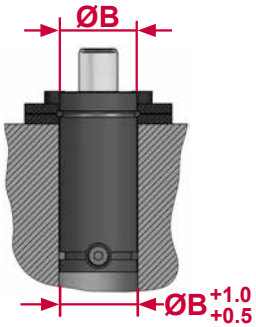

Incorrect pockets (i.e. larger diameter or shorter length) may cause structural damage or reduced life of gas springs.

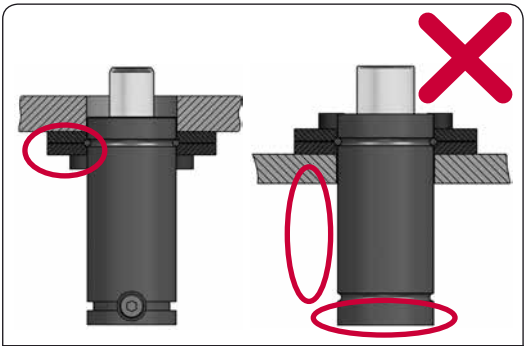

Fix the gas spring into the tool through the appropriate mount in the right way.

Do not use the piston rod threaded hole for fixing the gas spring into the tool.
The top rod threaded hole is only to be used when servicing the gas springs.

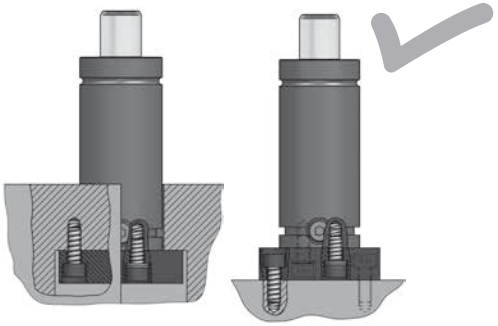

<u>Example mount type A</u>
When using mount type A into a bored pocket, the bored pocket diameter should not exceed 1mm larger than the gas spring body diameter.

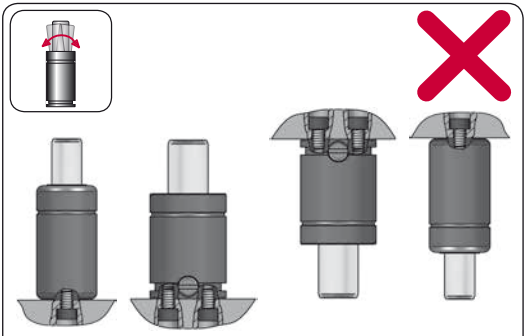

<u>Example mount type A</u>
In Compact Power Stroke series (CS) the bottom should be supported at all the times. A flat surface against the base is always required.

AZOL GAS

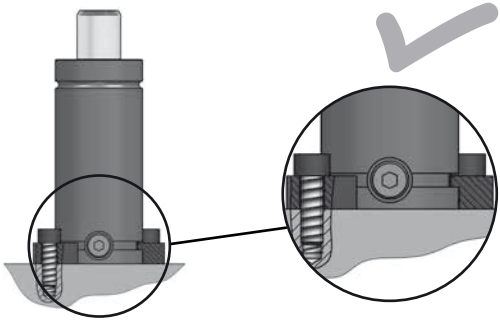

INSTALLATION EXAMPLES

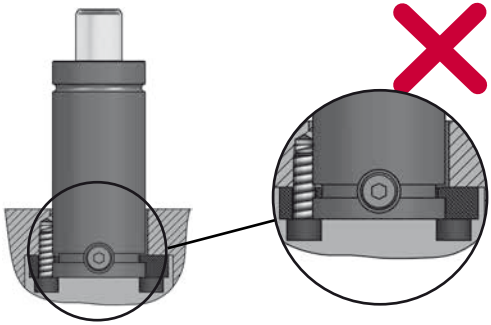

Example mount type B
Fix the gas spring into the tool through the appropriate mount in the right way.

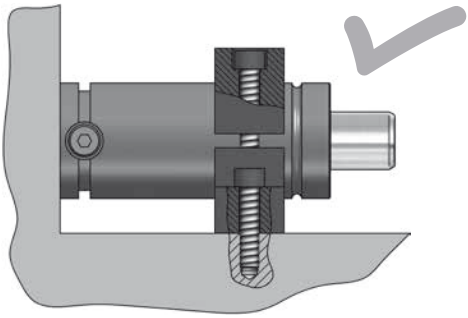

In MINI and Compact Height series (CW) avoid side loads by using the appropriate mounts.
Do not fix the MINI and Compact Height series (CW) to the tool only by using screws at the bottom.

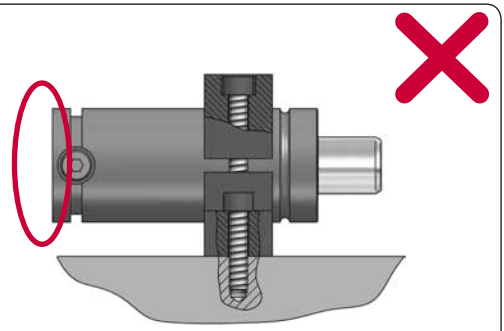

Example mount type C
Fix the gas spring into the tool through the appropriate mount in the right way.

Example mount type C
The bottom should be supported at all the times. A flat surface against the base is always required.

Example mount type D
Fix the gas spring into the tool through the appropriate mount in the right way.

Example mount type D
The bottom should be supported at all the times. A flat surface against the base is always required.

MINI gas springs series the force is defined by colored label.

MINI gas springs series only the model and stroke are engraved on the body (not the force).

FROM SELF-CONTAINED TO HOSED

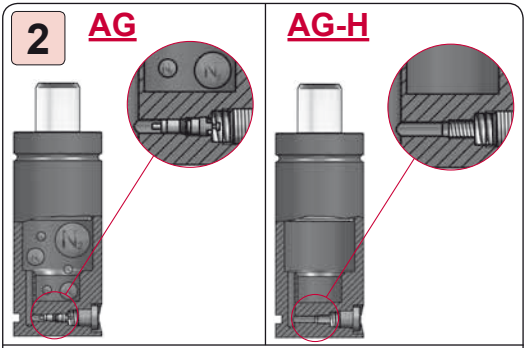

AZOL GAS

1

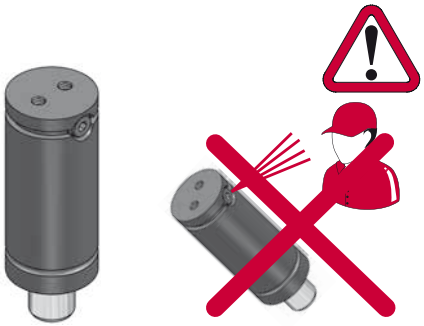

Gas springs may be ordered as a self-contained use or as a linked use.
Check in the corresponding catalogue sheet how to order (just by adding -H to the gas spring model).

2

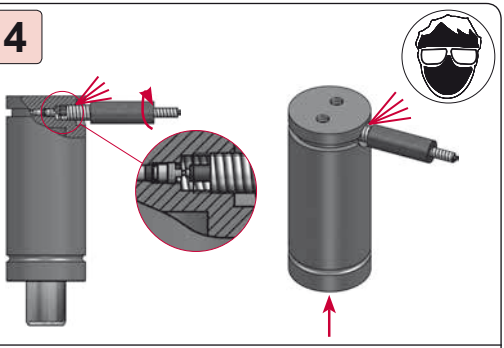

Gas springs for a self-contained use are supplied with filling valve and fully load with N_2 gas.
Gas springs for a linked use are supplied without filling valve and discharged (without N_2 gas).

3

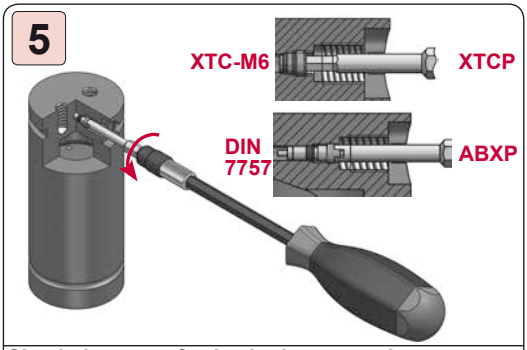

In order to unload the gas spring, set it rod down.
When discharging a gas spring point the gas flow away from operator or anybody else.

4

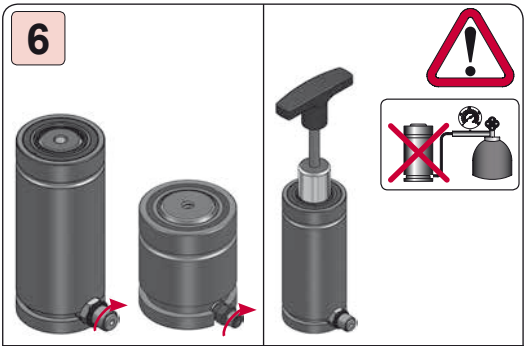

Thread the draining tool to the filling port thread and turn it slowly in order to get it fully drained.
Check the cylinder is completely unloaded, it should be possible to insert the rod by hand and stay in this position.

5

Check the type of valve in the gas spring.
Use the corresponding key adapter to unscrew the valve:
- ABXP
- XTCP

6

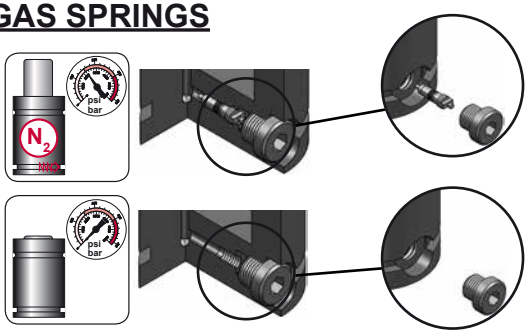

Fit the corresponding adapter (M6 or G1/8").
Extend fully the piston rod with the corresponding LM tool, never with gas.
Gas spring is now ready to be linked.

TEMPERATURE

AZOL GAS

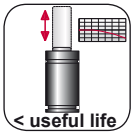

CHALLENGE

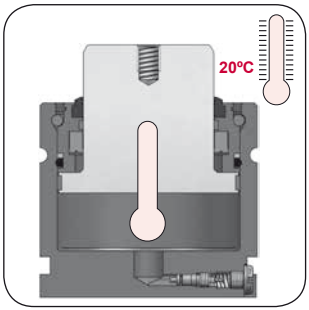

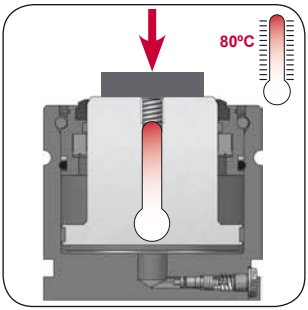

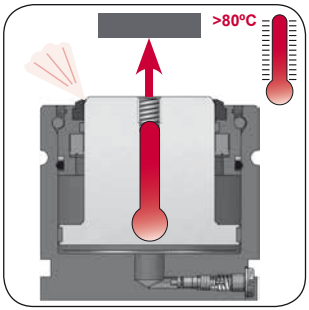

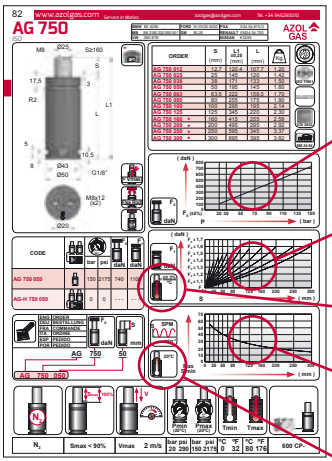

According to the technical specifications, the maximum operating temperature (**Tmax**) of gas springs is **80 ° C**.

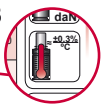

The temperature increase above the maximum allowable (Tmax) causes deterioration of the sealing elements and **reduces the life** of the gas springs.

FACTORS

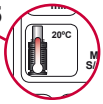

1.Initial pressure: the higher initial charging pressure, the higher temperature into the gas spring during operation.

2.Gas volume: the higher is volume inside the gas spring, the lower is the compression rate and temperature.

3.Pressure/temperature raise factor: due to friction, gas springs are heated when operating and the gas pressure increases with raising temperature (about 0.33% for every 1ºC).

4.Frequency and stroke used: the major stroke used, higher friction and greater temperature increase in the gas spring, so that the maximum rate in cycles per minute SPM is smaller.

5.Working environment temperature: estimated maximum SPM is based on a working environment temperature of 20ºC. The higher working environment temperature, the lower maximum SPM achieved.

Main factors increasing gas springs temperature:

- P_0 Initial pressure (bar)
- S Working stroke (mm)
- SPM Frequency (cycles per minute)

AZOL GAS

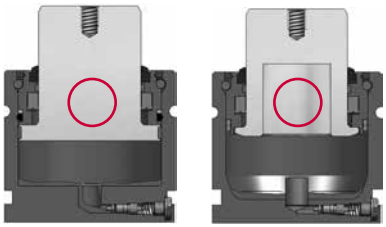

TEMPERATURE

SOLUTIONS

The new generation of AZOLGAS gas springs are equipped with technology ready to achieve a better performance even in the new application challenges.

GAS VOLUME

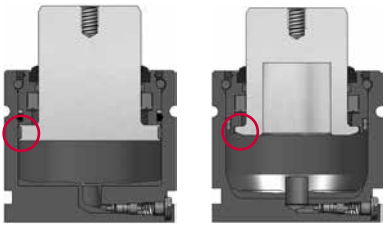

The AZOLGAS gas springs are designed to contain higher gas volume and lower compression ratio, which means a substantial reduction of the working temperature.

FRICTION

The AZOLGAS gas springs incorporates floating rod that prevent friction of the piston red guiding against the body and allow a free flow of gas into the cylinder.

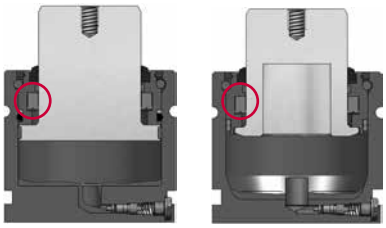

Additionally, the systems FR (Flex Rod) included in most of AZOLGAS gas springs, minimizes friction caused by side loading or deviations from perpendicularity.

SEALING ELEMENTS

The sealing elements of the AZOLGAS gas springs incorporate low friction designs and materials.

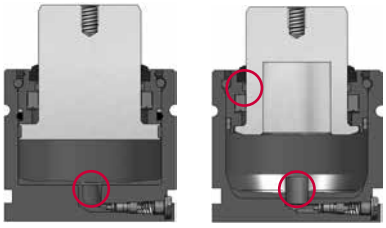

In parallel, the new sealing elements can withstand higher dynamic working temperatures.

LUBRICATION

The self-lubricating guiding components prevent metal to metal contact, achieving a significant reduction of friction / temperature.

The AZOLGAS gas springs are equipped with special synthetic lubrication that reduces wear of the components.

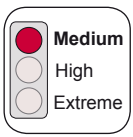

FR (FLEX ROD)

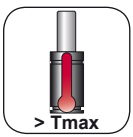

AZOL GAS

CHALLENGE

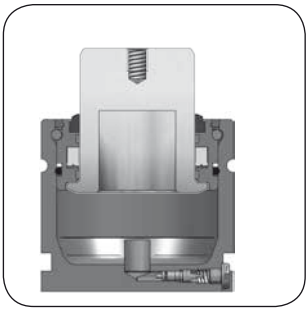

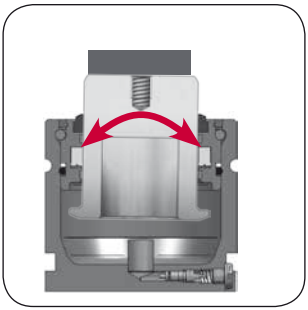

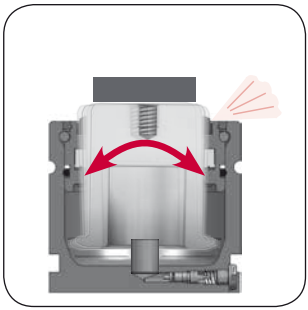

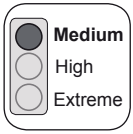

Certain application conditions involve the existence of sideloads or **deviations from perpendicularity**.

Depending on the intensity of sideload or perpendicularity deviation, a rigid guiding of a gas spring is not sufficient to achieve optimal performance at the above conditions.

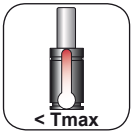

Sideloads or deviations from perpendicularity cause a higher friction on the sealing elements of the gas spring, what increases the pressure and the temperature and r**educe its useful life**.

SOLUTION

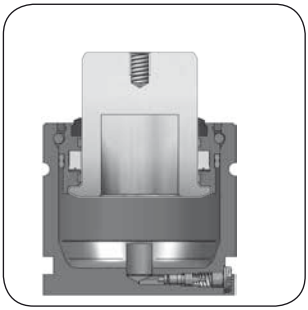

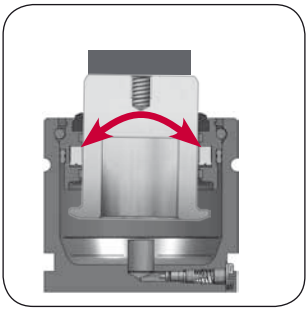

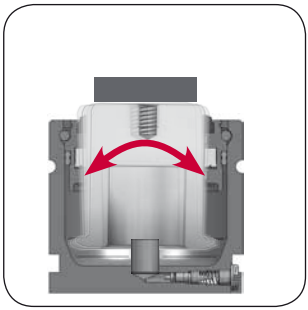

AZOLGAS designed a flex rod system **FR** that swings over the cartridge, suceeding to minimize the impact of sideloads or deviations from perpendicularity and **extending the useful life** of the gas springs.

The **FR sytem improves** the guiding of gas springs, and is particularly suitable for medium duty incidents (deviations from perpendicularity up to 1º).

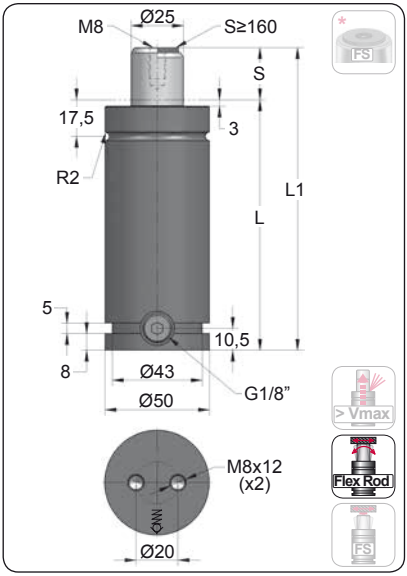

FR solution is incorporated in most of AZOLGAS gas springs, **saves costs**, increases productivity, and let use in existing applications without modification of any dimension.

AZOL GAS

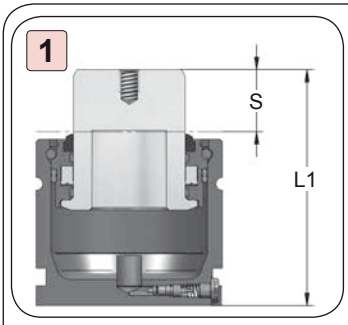

FR (FLEX ROD)

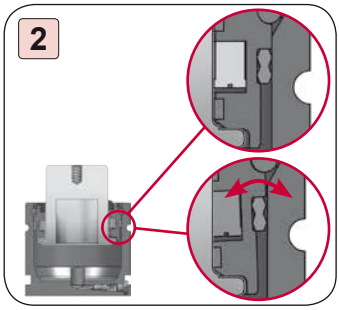

ADVANTAGES

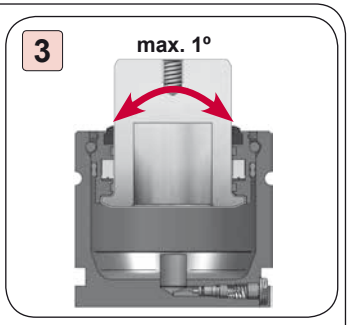

- Fitted as **standard**.
- **Saves** costs.
- Increases **productivity**.
- Use in **existing applications**.
- **Extra** guiding. Medium incident.

FLEX ROD

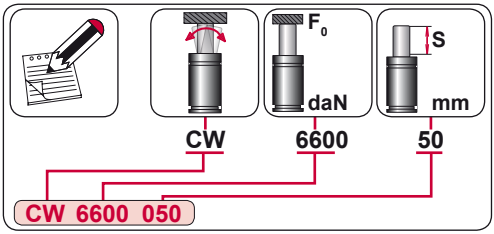

1. The FR system does not involve a variation of the dimensions of the gas spring.
2. FR (Flex Rod) design enables a flexible joint between the cartridge and the piston rod of the gas spring.
3. Allows deviation from perpendicularity up to 1º.

HOW TO ORDER

FS (FLEX SIDELOAD)

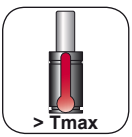

AZOL GAS

CHALLENGE

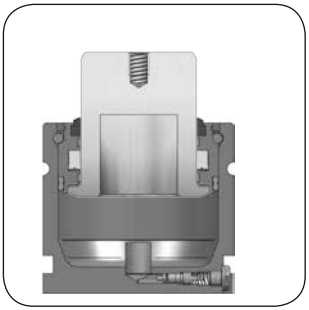

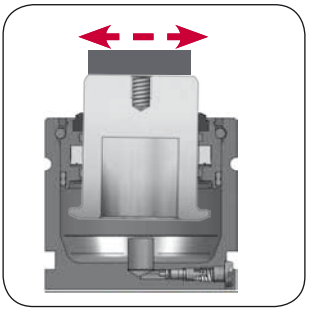

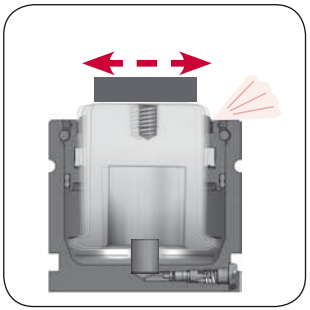

Certain application conditions involve the existence of **sideloads**.

Depending on the intensity of the sideload, a rigid guiding of a gas spring is not sufficient to achieve optimal performance at the above conditions.

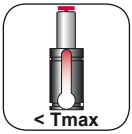

Sideloads cause a higher friction on the sealing elements of the gas spring, what increases the pressure and the temperature and **reduce its useful life**.

SOLUTION

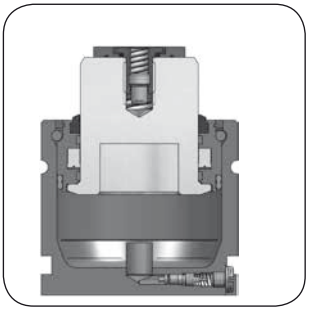

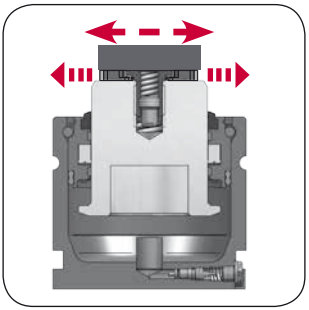

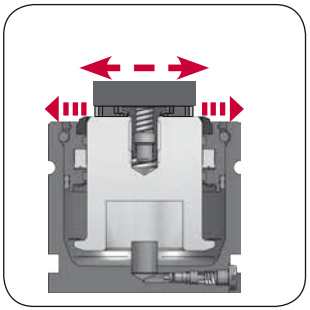

AZOLGAS designed a flex sideload system **FS** that acts on the piston rod, suceeding to minimize the impact of sideloads and **extending the useful life** of the gas springs.

The **FS** sytem **improves** the **guiding** of gas springs, and is particularly suitable for high duty incidents (sideloads up to 1 mm, 0.5 to any position).

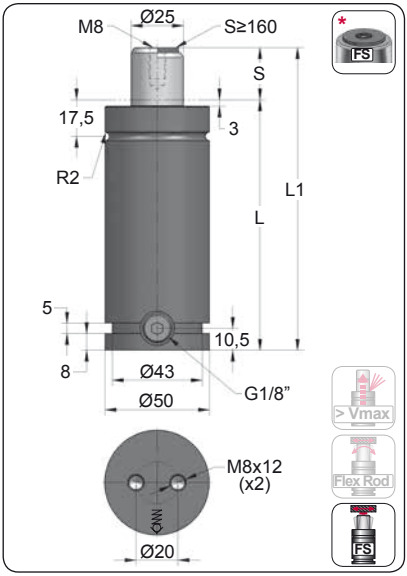

FS solution **saves costs**, increases productivity, and let use in existing applications without modification of any dimension.

AZOL GAS

FS (FLEX SIDELOAD)

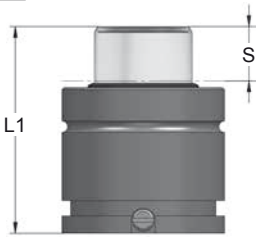

ADVANTAGES

- **Saves** costs.
- Increases **productivity**.
- Same standard **dimensions**.
- Use in **existing applications**.
- **Extra** guiding. High incident.

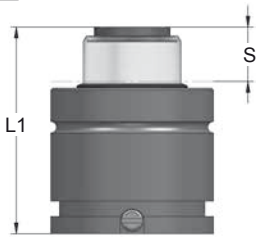

FLEX SIDELOAD

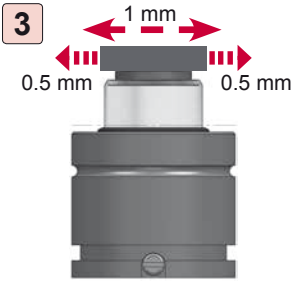

1 CW 6600

2 CW-FS 6600

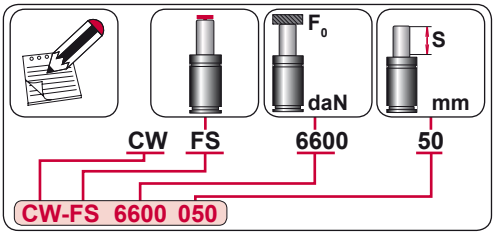

3

1. The FS system does not involve a variation of the dimensions of the gas spring.
2. Respects the same overall length L1 and the same nominal stroke S than a standard gas spring.
3. Allows lateral movement up to 1 mm, 0.5 mm in any direction from its centered position.

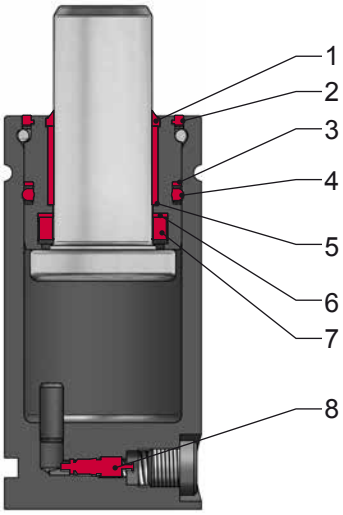

HOW TO ORDER

SPS 1/8

RoHS 2002/95/EC

HOW TO ORDER

TECHNICAL DATA

Range:	50 - 200 bar.
Tolerance:	±5 bar a 20 ºC.
Thread:	G1/4" y G1/8"
Tension:	Max. 250 V.
Safey over-pressure:	300 bar.
Working temperature:	-25 ºC to +50 ºC.

If the pressure of the piping circuit drops below a set limit user (optimal minimum operation), the switch sends a signal can be used to either warn or stop mechanism that is associated.

ADVANTAGES

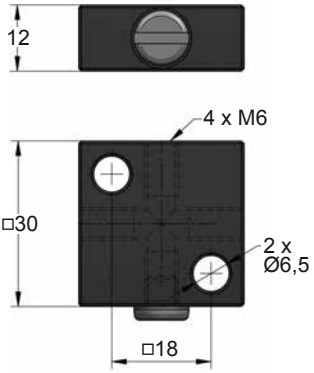

- Compact design.
- Allows automatic control of piping circuits.
- Alert previously avoiding the production of defective parts.
- Increased efficiency in production.

AZOL GAS

ACCSESSORIES

DBNA

ADVANTAGES

- Maximum safety.
- Easy boosting.
- Save costs.
- Increases porductivity.

BOOSTER UNIT

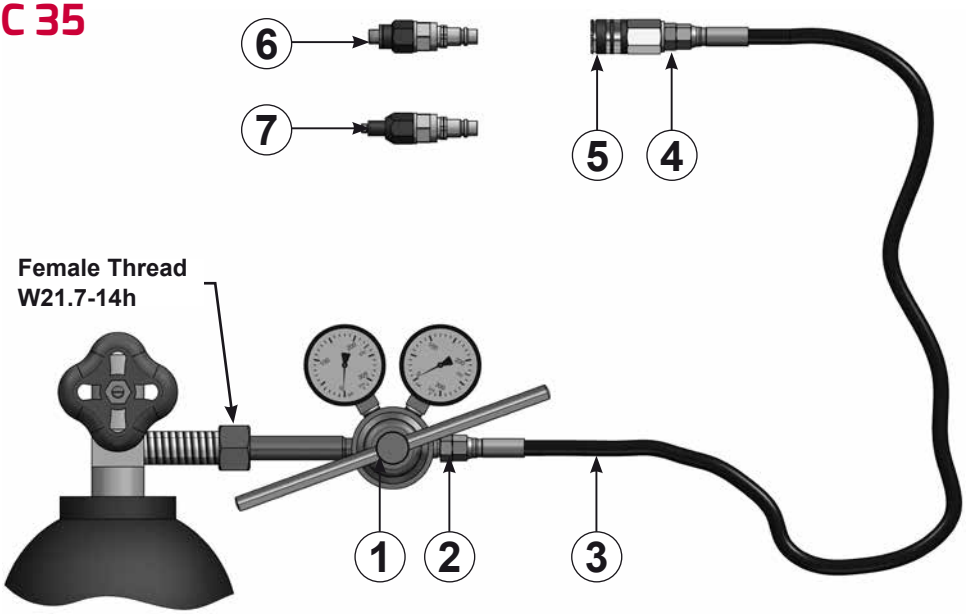

DBNA gas booster enables to charge gas springs and manifold systems from your supply tank. The booster is a solution to low pressure supply tank to a minimum of 20 bar (when the tank pressure is lower than the gas springs filling pressure).

TECHNICAL DATA	
Max. Pressure	200 bar
Pneumatic pressure	5 - 7 bar
Flow	2.8 l/min
Weight	12 Kg

ACCSESSORIES

AZOL GAS

EC 35

CHARGING UNIT

The Charging Unit EC 35 let you:

-Check the pressure from the nitrogen tank.

-Charging pressure to self-contained gas springs.

-Charging pressure to hosed systems.

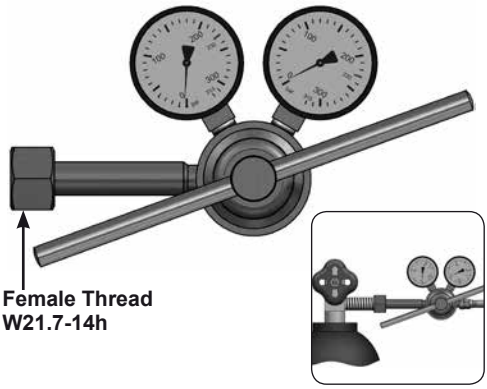

EC 35 is equipped with:

1-Pressure regulator LTH 600
2-Adapter 7RT4
3-Hose TFRR 3000
4-Adapter 7RM2
5-Female Quick Coupling QCF 1/4
6-Charging adapter 18 HI 4-Q (G1/8")
7-Charging adapter 06 HI 8-Q (M6)

AZOL GAS

ACCSESSORIES

LTH 600

18 HI 4-Q

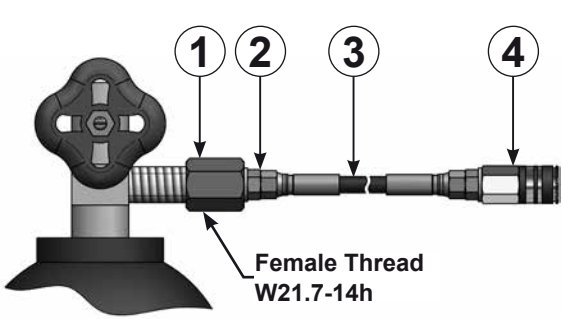

06 HI 8-Q

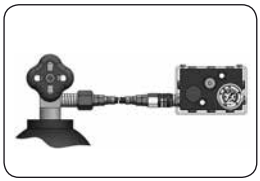

EC 03

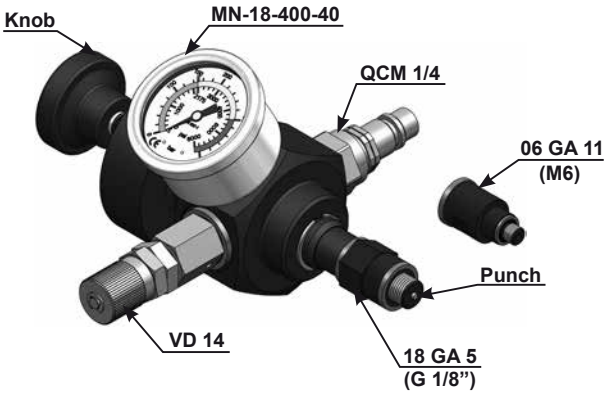

EC 03 is equipped with:

1-Adapter **AC 500**
2-Adapter **7RM2**
3-Hose **TFRR 2000**
4-Female Quick Coupling **QCF 1/4**

A 400 C

A400 C let you to check the pressure of the gas springs, modify the pressure if necessary, and fill or drain the pressure as desired.

This Filling & Control Unit can be used for all AZOLGAS gas springs.

TECHNICAL DATA	
Fluid	N_2
Max pressure	210 bar
Gauge	0 - 400 bar
Working temperature	0º - 100ºC
